Introduction

```
#include <iostream>

using namespace std;

int main()
{
    cout << "Hello, World!" << endl;
    return 0;
}
```

```
#include <iostream>
```

```
using namespace std;
```

```
int main()
{
    cout << "Hello, World!" << endl;
    return 0;
}
```

```
#include <iostream>
```

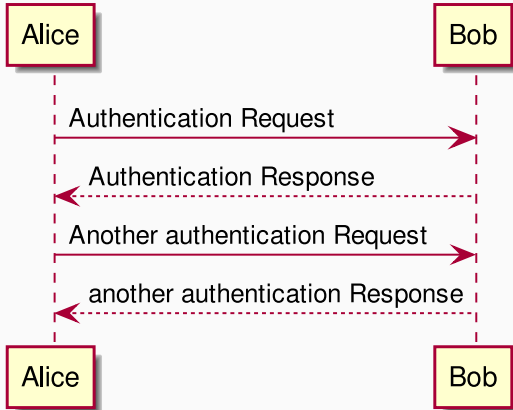

```
int main()
{
    std::cout << "Hello, World!\n";
    return 0;
}
```

The code on the right is right. The code on the left is wrong.

When you show a good and a bad example side-by-side, make sure that the good example is always on the right hand side.

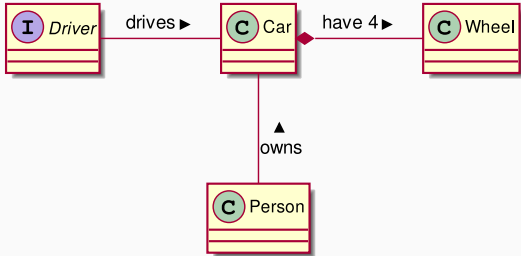

Your humble narrator
